MEMORANDUM FOR: SA/PC/DCI

SUBJECT : Training Program for Ramo-Wooldridge

In connection with the training program to be carried on by Ramo-Wooldridge for electronic maintenance personnel, Ramo Wooldridge has requested that two sets of all electronic equipment being installed in the aircraft by Lockheed and 50 sets of instruction manuals be made available at the earliest possible date. It would appear to be possible to hold out two sets of such equipment, i.e. those intended for aircraft # 19 and 20, for instructional use. However, it would be my judgment that the heating the equipment would take during instruction might well impair its reliability. I would, therefore, suggest that [REDACTED] be asked to obtain two additional sets of all electronic GFE provided for Lockheed (with instruction manuals) and that Lockheed be asked to procure two additional sets of the VHF radio equipment and the auto-pilot (with instruction manuals) which will be incorporated in the aircraft. Of course, special electronic packages being fabricated by R-W will be available for instruction purposes without additional procurement.
